

Hampson Group establish new manufacturing business park in India...

Delivering quality-assured, low cost solutions for global competitive advantage...

**New low cost Hampson manufacturing facilities in India**

Hampson, the international precision engineering group with world-wide expertise in complex, close-tolerance, performance-critical components and assemblies for aerospace, automotive and specialist engineering applications, has established a state-of-the-art, low-cost manufacturing facility in Bangalore, India.

Phase one (50,000 sq.ft.) of the planned four-phase development on the 14 acre greenfield site is now complete and operational, supporting both export and domestic manufacturing requirements.

**Low-cost sourcing without the traditional risk.**

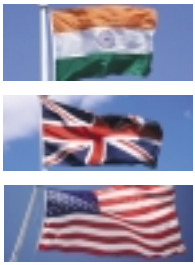

**A highly skilled, professional and motivated workforce...**

- World-class, lean production system
- High calibre, highly educated multi-national management team
- Fully qualified, UK-trained workforce with experience drawn from the automotive OEM, turbocharger & bearing industries. Average age 35 years
- Training to all levels on 5s & Kaizen (Kaizen Institute)
- Established local sourcing expertise & supply chain management
- SAP ERP system. ISO & TS quality systems approvals
- Planned modular expansion to 200,000 sq.ft.

Providing added-value solutions in precision engineering & manufacturing to the world's most innovative companies

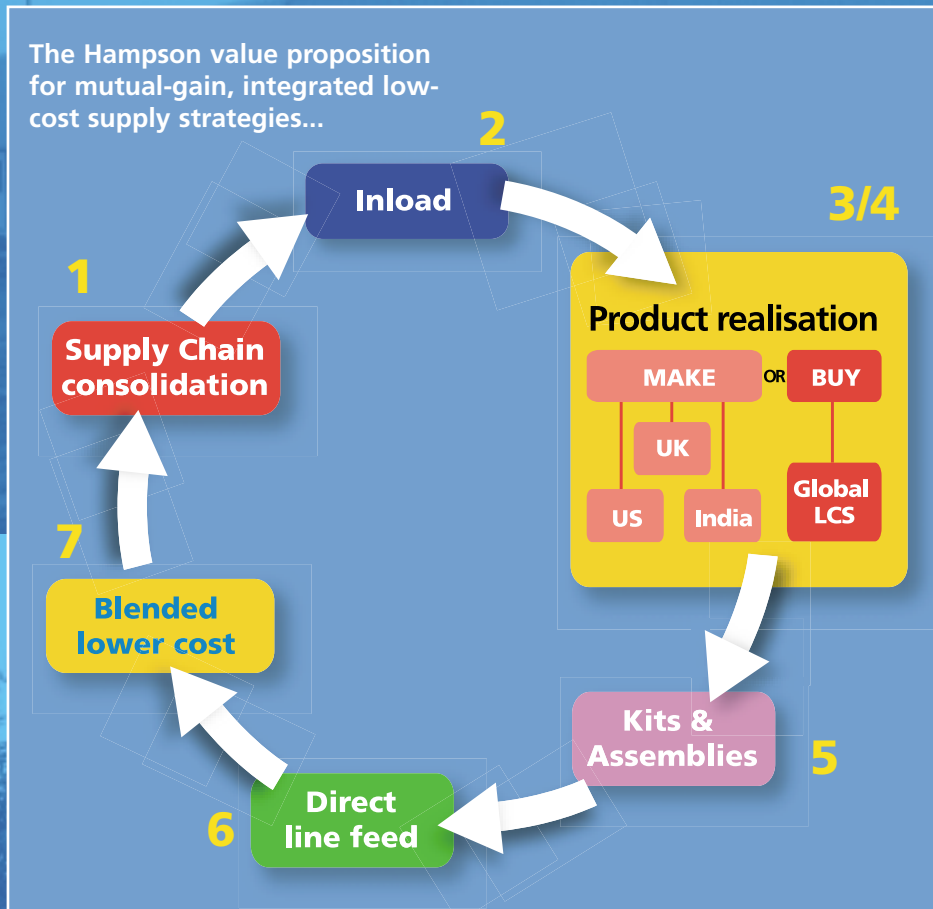

Adding value through innovation, investment and fully integrated manufacturing solutions...

professionalism  
commitment excellence

A strong & visionary, full capability, international partner with world-class sourcing, integration, manufacturing and assembly expertise...

**Integrated low-cost sourcing...**

- 1 Consolidation of customers' fragmented, high cost "traditional" supply chains
- 2 Inload of work packages to single source - value added through fixed cost dilution
- 3 Make/buy analysis to determine best route to achieve cost/performance requirements
- 4 Fully managed, quality assured, low-cost, lean manufacture – in house & external
- 5 Integration & kitting/assembly of manufactured & sourced components
- 6 Shipment JIT direct to build line/buffer point via managed logistics
- 7 Realisation of blended cost reductions for mutual gain sharing

**Low risk, low-cost sourcing & manufacturing**
